

# ***Alaska Review looks at state's oil money***

During the past ten years, Alaska has become rich because of oil activity. America's thirst for oil indicates that our state will become even richer in the future. But how much oil is in Alaska, and how long will this money flow?

Already the state treasury has a surplus as a result of windfall profits. Questions are being raised about the use of that

money: should we cut the state income tax, put it in the Permanent Fund, or expand the development of other resources?

ALASKA REVIEW examines the state budget surplus; where the oil money will go and what happens when it runs out.

Viewers throughout the state are requested to consult local programming schedules for airing times of the program.
