

VALVOLINE

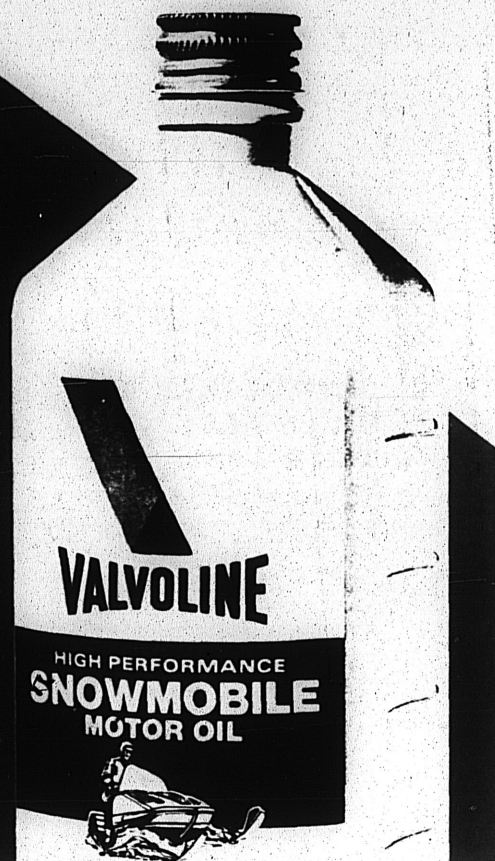

SNOWMOBILE MOTOR OIL

VALVOLINE HIGH PERFORMANCE SNOWMOBILE MOTOR OIL is a truly multi-functional lubricant. This heavy-duty oil was specifically designed for two-cycle snowmobile engines operating under high-speed and severe high-load, high-temperature conditions. Containing detergent and other special additives, this quality product formulation combats piston scuffing and engine wear... protects against the buildup of carbon deposits which contributes to fouled plugs, overheating and pre-ignition. Valvoline High Performance Snowmobile Motor Oil provides reliable lubrication where engine design restricts the flow of cooling air. Includes compounds to assure rapid and complete mixing with gasoline, effective lubrication at low temperatures, and rust protection during shut-down and storage. Recommended at fuel/oil ratios from 11:1 to 100:1. Can be used wherever an SAE 30, SAE 40, or SAE 50 grade is specified.
