

LEGAL NOTICE

(Continued from Page 10)

18a. A trail leading east and west across Regional selected lands in protracted T. 8 S., R. 14 W., Umat Meridian, to public lands.

18b. A trail from the confluence of the Colville River and the Oolamnagvik River in protracted T. 5 S., R. 9 W., Umat Meridian, along the right bank of the Oolamnagvik River to public lands to the south.

1. (EIN 23-C) The general right to enter upon the lands herein granted for cadastral, geodetic or other survey purposes is reserved together with the right to do all things necessary in connection therewith.

m. (EIN 24-C) An easement for the transportation of energy, fuel and natural resources which are the property of the United States or which are intended for delivery to the United States or which are produced by the United States. This easement also includes the right to build any related facilities necessary for the exercise of the right to transport energy, fuel and natural resources including those related facilities necessary during periods of planning, locating, constructing, operating, maintaining or terminating transportation systems. The specific location of this easement shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easement will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; provided, however, that the United States may exercise the right of eminent domain if such consent is not given. Only those portions of this easement that are actually in use or that are expressly authorized on March 3, 1996 shall continue to be in force.

The grant of lands by the Interim conveyance shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands.

2. Valid existing rights therein, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act (72 Stat. 339, 341), contract, permit, right of way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him.

All of the lands contained in the following oil and gas leases are herein approved for interim conveyance; therefore, in accordance with the provisions of section 14(g) of the Alaska Native Claims Settlement Act, the United States will waive administration of the leases and transfer them to the Arctic Slope Regional Corporation when conveyance of the lands is issued.

Interim conveyance to the remaining entitlement for the Arctic Slope Regional Corporation will be made at a later date.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the TUNDRA TIMES. Any party claiming a property interest in land affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P. O. Box 2433, Anchorage, Alaska 99510, with a copy served upon the Bureau of Land Management and the Regional Solicitor, Office of the Solicitor, 1016 West Sixth Avenue, Suite 201, Anchorage, Alaska 99501; also:

1. Any party receiving actual notice of this decision shall have 30 days from the receipt of actual notice to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign a receipt for actual notice, shall have 30 days from the date of publication in the FEDERAL REGISTER which is September 17, 1976, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived their rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of, and the requirements for, filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

NEWS BRIEFS

ALASKA'S FIRST breast cancer detection clinic will open next week. Posing for Project Now photographer, Donnie Felix are the center's board member Mary Jane Fate, Dr. Lawrence Dunlap, Dr. James Creps, the center's director Becky Yanagihara and registered nurse Dort McMillan. McMillan is training as the clinic palpator. The center is soliciting donations and volunteers. See related story on page one.

There is a new group for Native men with alcoholism problems here in Fairbanks. Colo Rado, of the Fairbanks Native Association Comprehensive Alcoholism Program (C.A.P.) and the Drop In Center, announces that the Native Brotherhood, will meet every Wednesday evening at 7. The meeting location is 1550 Gillam Way. Transportation is provided if you call Rado or Jim K at 456-7958 or 452-8761. The Native Brotherhood is not related to the Alaska Native Brotherhood or the Alaska Native Sisterhood, which are Southeastern Native political and civic organizations.

In a recent letter to President Gerald Ford and Secretary of Interior Thomas Kleppe, Alaska Gov. Jay Hammond said enactment of Senate Bill 521, the "Outer Continental Shelf Lands Act Amendments," would be "a giant step toward the constructive resolution of many of the concerns Alaska and other states have expressed about the federal O.C.S. lease program. The bill achieves a fair union between the need to meet national energy goals and the right of the states to a role in major federal O.C.S. energy decisions affecting state jurisdictions."

The governor added, "Although not fully satisfying all state interests on this issue, the bill, in my view, represents a major improvement over the present program."

Hammond also wrote, "This legislation amends many of the shortcomings of the antiquated Outer Continental Shelf Lands Act of 1953, including most of the flaws that have pitted the O.C.S. lease program against Alaska's legitimate interests." He said the bill had seven key points, including a five-year plan for the federal lease program; a process for state and regional recommendations on lease sale decisions and development plans; consistency of federal programs with state and local planning efforts; sharing federal resource data on tracts adjacent to state lands; cancellation of leases when evidence indicates further development would be harmful to human and marine environments; the equitable sharing of O.C.S. benefits; and the creation of a \$100 million oil spill liability fund.

The governor continued, "Each of these features is important to Alaska. Together

they create the framework and the mood for the kind of state-federal cooperation needed to move ahead on off-shore oil development without pushing aside the legitimate concerns of the states, and certainly overbalance any deficiencies of the bill."

Hammond concluded by "strongly urging" the President to support and sign the measure "for the sake of a stronger future partnership between state and nation in off-shore oil and gas development."

The Nome Hospital, Alaskan winterization projects and emergency food and medical services will be funded by the Fiscal Year 1977 Labor-HEW appropriations bill which became law recently.

U.S. Sen. Ted Stevens, a Senate conferee on the bill, gained \$5 million for construction of the Nome Hospital and had added a provision insuring at least \$600,000 for Alaskan winterization projects from the Community Services Administration.

The new law contains \$28 million for emergency food and medical services nationwide.

The Public Broadcasting Corporation will receive \$103 million by the law.

A joint Senate-House conference has approved a bill authorizing a national census to be conducted every five years rather than every ten. After the conference report is approved by both houses, the bill will be sent to the White House.

The mid-decade census could mean increased federal funding for Alaska from programs using population as a determining factor, and it will help the state in its planning of services, U.S. Sen. Ted Stevens, a co-sponsor and a Senate conferee, said.

The Bureau of the Census estimates that between the 1970 census and July 1, 1975, Alaska's population increased by

16.3%. An official census every five years would allow this rapid change to be reflected in federal funding and programs, Stevens said.

The Office of Management and Budget estimates that about \$39 billion in federal funds are distributed every year to the states according to formulas based on population.

Nine Soviet engineers specializing in construction in northern climes will be aided by the Alaska District, U.S. Army Corps of Engineers during their professional visit here this month.

The team visiting from USSR will be meeting and exchanging experiences and technical information with Arctic construction specialists in Anchorage and Fairbanks representing municipal, state and federal agencies, as well as private firms. Part of the visit schedule includes a briefing by the Alaska District Engineer, Col. George R. Robertson, describing Corps experiences with construction and design problems and their solutions in Alaska.

Among the meetings set up by the district, arranged by Harlan E. Moore, chief of its foundations and materials branch, are presentations on thermopile design and operation, municipal building inspection, the capital relocation plan, design of a large structure on the North Slope, visits to the University of Alaska and the Cold Regions Research and Engineering Laboratory (CRREL) permafrost tunnel at Fox, as well as discussions about the trans-Alaska pipeline and the district's big Chena River Flood Control Project in the Fairbanks area.

The study theme for the Soviets is "Building for Extreme Climates and Unusual Geological Conditions." The visitors are experts in building in permafrost areas, foundations, building design, underground construction and similar activities.
