# FINALLY. AN 80CC BIKE WITH SOME GUTS.

Take the ST80. It has the guttiest 80cc engine on the market, yet it handles like a lightweight, safe and easy. How big is it? Big enough to fly up a 13,000 foot mountain with a 200-pounder aboard.

Aggie Harrison is a Personnel Specialist for Atlantic Richfield Company, but she spends at least as much time working with people outside her job as she does in our offices. Through her position on the board of the Greater Anchorage Area Community Action Agency, Aggie helps to plan and fund vital programs like those of the Older Persons Action Group, Headstart and Anchorage Youth Council. She's helped to put together a halfway house for alcoholic women, an arts workshop for Alaskan natives, and an emergency food and medical program. She carries a full schedule of speaking engagements, too — talking about Alaskan culture in the schools and discussing minority hire with professional groups. If there's a group working to smooth the way for people who have it rough, chances are Aggie is there. We wouldn't have it any other way.
